

Insite Core Banking Solution | *The Insite Banking System application is designed to provide customers with a complete in-house or hosted core data processing solution with flexibility to expand processing capabilities seamlessly through the inclusion of integrated ancillary products.*

 Utilizes the Microsoft Windows® operating system environment to create a single operating system solution: no Unix, no AS/400, and no mainframe.

 Integrates ancillary products such as Check Imaging and Internet Banking easily.

 Delivers a cost-effective, user-friendly application that will allow your community bank to provide increased customer service.

 Provides customers with unlimited ways of leveraging and maximizing the value of their data by being ODBC-compliant.

Integrated Products

All of our integrated products are included in the Insite Banking System core software. They provide ease of operation, quick access to critical information management, reliability, and cost effectiveness.

Add On Products

The supplementary add-on products are designed to eliminate tedious data entry or interfaces to other programs. The add-on products are designed to interface directly with the Insite Banking System with the easy click of a button. The Insite Banking System aids your financial institution in daily processing and eliminates 3rd party vendors and fees.

Direct Exception Processing

The Direct Exception Processing (DEP) module creates an item specific notice based on the transaction code you enter in a fast-entry edit screen or an account details screen (based on user preference). These notices list items that are being paid and associated charges and/or items being returned with associated charges.

Benefits of the Insite Banking System

-  Lower total cost of ownership
-  Increased performance
-  End service bureau dependency
-  Removal of legacy systems
-  Utilizing thin client technology
-  Toll free direct support lines

Government Loan Accounting

The GLA module was designed to assist bank staff with loan servicing responsibilities associated with government programs offered by entities such as the Federal National Mortgage Association (FNMA) and the Federal Home Loan Bank (FHLB).
